Asbestos Project Designer
AS600

Hours: In Class 24 Clinical Total 24

Description

This three-day course provides instruction on how to design asbestos abatement projects and hazard assessments for asbestos-containing materials in accordance with AHERA requirements.

Books

Asbestos Project Designer	- ISBN:	(Included)
Oklahoma Regulations (Gray Book)	- ISBN:	(Included)

Learning Objectives

1. List and describe the latest school, state, federal and local compliance regulations relating to asbestos abatement and project design.
2. Describe design and implementation of the asbestos abatement plan.
3. Describe the legal and insurance issues.
4. Describe the occupational health and safety issues.
5. Describe the abatement projects, clearance and engineering controls.
6. List and identify considerations for designing response actions and control options.
7. Describe and list removal post-removal practices for asbestos abatement work-sites.

Teaching Philosophy

We believe that instructors, staff, and administrators have a shared responsibility to provide: 1) innovative course design and instruction; 2) a safe, learner-centered environment; and 3) an authentic learning experience.

Evaluation Methods

A certificate of completion requires a minimum of 90% attendance and an examination score of 70%, in addition to the completion of all required

Grading Policy

90-100% = A, 80-89% = B, 70-79% = C, 60-69% = D, 59 & Below = F

Student Responsibilities

To ensure a quality and safe learning environment, students are required to follow the Post-Secondary Student Behavior policy #560. This policy can be found at www.mntc.edu/board-policies. Printed copies are available upon request.
minimum of 90% attendance
