

# Create Video for Instruction

## tt245

---

**PREREQUISITE:** Basic computer skills are assumed.

---

### **COURSE DESCRIPTION**

Using instructional video that the instructor has created and posting it on you tube is an effective way to demonstrate a skill or to "flip" the classroom. A flipped classroom is one where the students view the lecture as homework and then do the homework that is assigned in class. In this class you will create an instructional video using a flip camera or your personal camera or phone and then upload it to you tube.

### **COURSE OBJECTIVES**

At the completion of this course, the student will be able to

1. Discuss the "flipped" classroom.
2. Create an instructional video and post to you tube.

### **METHOD OF EVALUATION (FOR STUDENTS)**

Successful completion of this class students will:

- attend
- create an instructional video
